

SERVICING

Please use the following Menu to obtain a guide to the cost of having your motorcycle or scooter serviced at Bransons.

We have 4 stages of service all of which contain a minimum 50 point check-over and adjust/lubricate regime that covers the steering, suspension, braking, lighting and transmissions systems and the general well being of your motorcycle including a road test on completion. Our technicians have the expertise to service all makes of Japanese motorcycles as well as Triumph and BMW. Manufacturer's service intervals are not all identical, so you will see a range of mileages quoted for each service and a range of prices to reflect different models. Our Service Manager will confirm a price for your motorcycle at the time of booking or at your request.

If you would like to tailor your own service by excluding or adding any items we will be delighted to adjust the price to your requirements.

On completion of your service you will be provided with a comprehensive checklist of all the items attended to, together with a wear report on brake linings and tyres. You will also have the opportunity to discuss any aspect of your service with the Service Manager or Technician.

[Go to the "Workshop" page of our website for contact details or to send an email enquiry and we will contact you.](#)
